Android App

Login

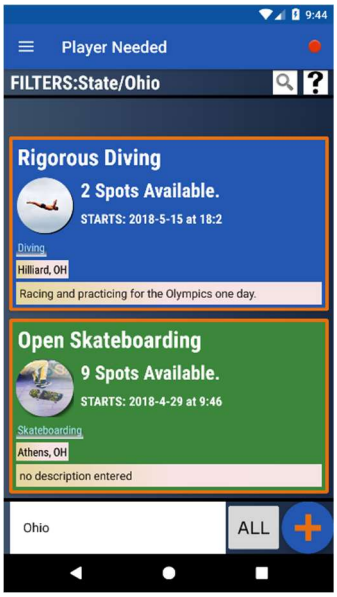

S1 

Screenshots: S number denotes a possible state.

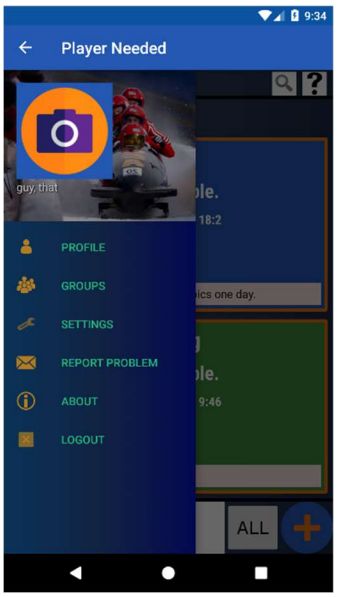

Details:

1. A user must 'Login' to use Player Needed. A valid email and password with at least 6 characters is required.
2. If you don't have an account, the 'Sign Up' will prompt you for all required information.
3. If you have forgotten your password, the 'Forgot your password?' link should come in handy.
4. If you have previously signed in, this screen will be skipped, and the app will use you cached credentials to sign you in and take you to the Landing Page.

Landing Page

S1

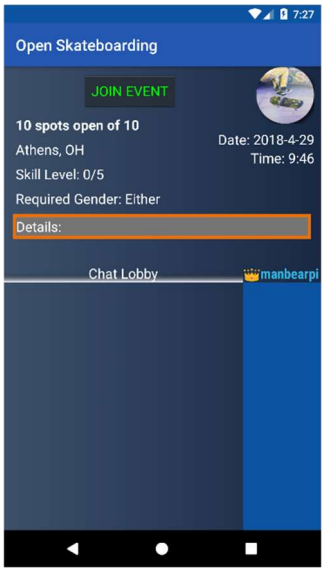

S2

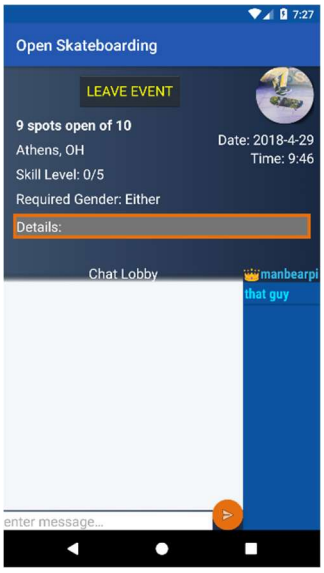

Details:

1. The Landing Page automatically filters to events in your State only. You can click on any event card to visit the Event Lobby. If your State is not set on your Profile, a prompt will appear asking you to do so. You can reset the filter and see all Player Needed public events in all states by click the 'ALL' button. Click on the filter spinner (pictured here as 'Ohio') to change it by Sport or State. You can also click on the 'Search' Icon to custom search through all events.
2. The Floating Action Button (with the orange cross) will walk a user through creating a New Event.
3. Event Cards (Open Skateboarding and Rigorous Diving seen here) are color coded to provide some general information to the user. Click the '?' at the top right for more information on these four-color codes.
4. A Red clickable notification Dot appears at the top right if you have any notifications waiting for you to see.
5. The top left Hamburger menu to open the general user Menu. The Drawer Menu provides links to:
    a. Your Profile
    b. Groups Functionality
    c. App Settings Page
        i. verify email, delete account, change real name
    d. Report a Problem via Email
    e. About Page
        i. contains version information, check for updates, and dev info
    f. Logout of Account

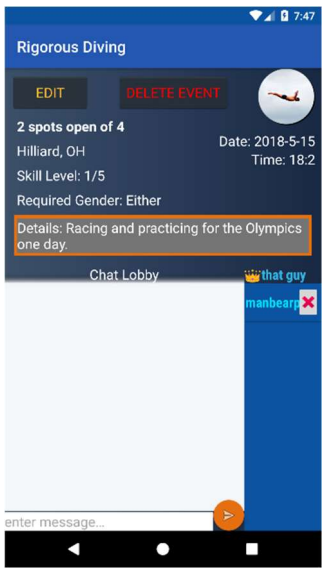

Event Lobby

S2

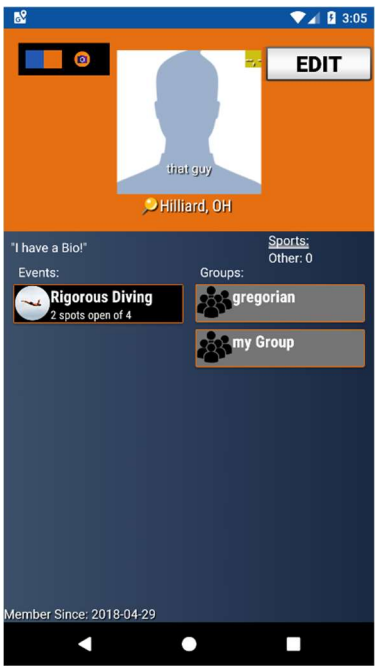

S3

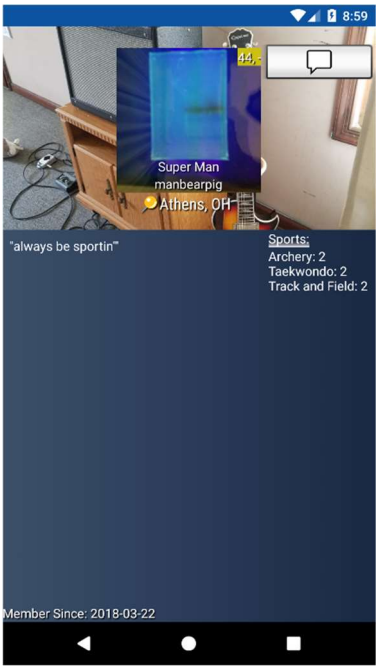

Details:

1. The Join, Leave Event, Edit, and Delete buttons are managed automatically depending on your role towards this event.
2. All player names are clickable to go to their profile.
3. Hosts can chat, remove users (boot), Edit any of the event details, and Delete the event.
4. Other players can Join the event and Leave it. While listed as a member of the event, they can send open chat messages to other in the lobby.

Profiles

S1

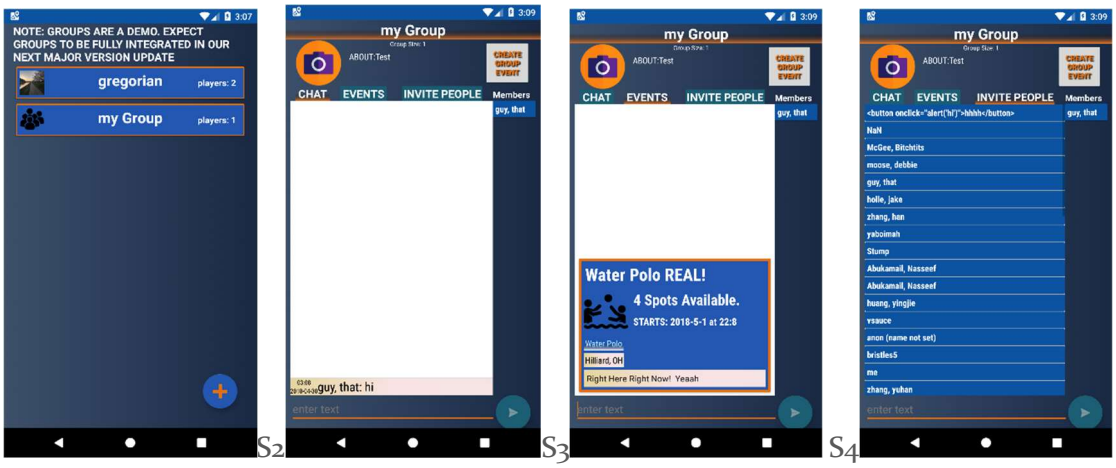

S2

Details:

1. If you are looking at your own profile, you will see additional options to
    a. manage your profile look
    b. Edit your details
    c. navigate to events and groups you are involved in.
2. If you are looking at someone else's profile, you will see all the details they have publicly available and have the option to send a Private Message to them.
3. Sending a private message notifies the other user that they have a message waiting to be viewed. You will be notified when they reply.

Groups

S1 S2 S3 S4

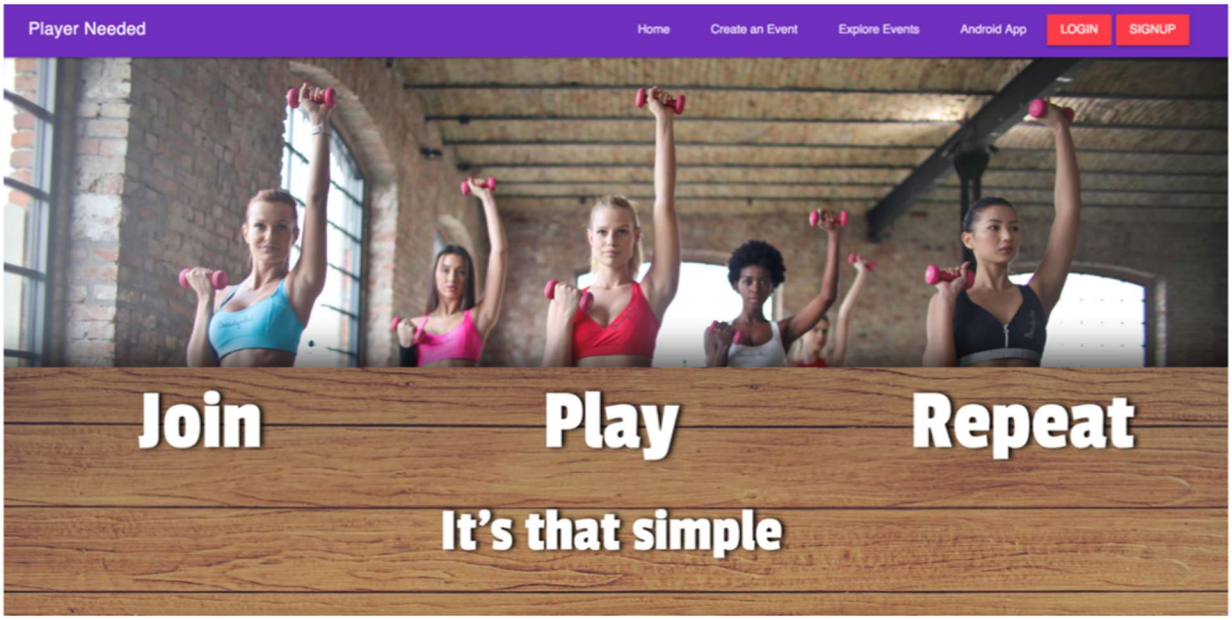

Details:

1. Groups you are involved with show up on a list. Click the '+' floating action button to begin creating a new group.
2. Groups have 3 interactive tabs near the top: CHAT, EVENTS, and INVITE PEOPLE
3. You can chat with anyone in the group, all profiles are clickable and you can send someone a private message through their profile.
4. Currently, any member can create a Group Event. Events are not fully clickable yet as the framework for that is still being built as of this version.
5. Inviting people works with Long Click Presses on the username. A notification is sent to the recipient, prompted them to join your group.
